

## Omni Intelligence FAQ - Licensing

### How Does Licensing work?

Licensing of OI is based on concurrent sessions.

E.g.

1x Admin License = 1x Admin Account with 1 session,

2x Admin License = 1x Admin Account with 2 session OR 2x Admin Account with 1 session

5x User License = 1x User Account with 5 sessions OR 5x User Accounts with 1 session each (or any mixture in-between)

### FAQs

**Q: What is the difference between Admin and User?**

A user license can simply display statistics and is intended for wallboards or agents themselves.

**Q: I have the same username logged in twice, but the displays aren't synchronised?**

Each OI account can only save/display one set of Analytics displays.

If the end user requires different views/displays on different wallboards, then an additional login/account will be required.
